

# DRESS™ R

## SERIES

# DRESS R

technical data

The Dress R collection evokes all the charm of a haute couture evening gown, witnessing how testing and technical research can produce exclusive aesthetic results. As a matter of fact, the metal fabric lampshade is entirely hand-crumpled, making each lamp unique. The fabric, wrapped around a PVC support, creates a fascinating transparency effect when the light is on, giving to the light the appearance of a tactile and seductive veil. Dress R, either on or off, thanks to its elegance, is an easy fit in the most refined modern décor and appears flawless in all its variations and sizes. The fabric used for the lampshades passed the glow wire test at 850°C, which makes it suitable for installation in public spaces.

**TYPE:**

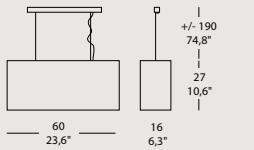

**PROJECT NAME:**

**Frame:** satin finish stainless steel.

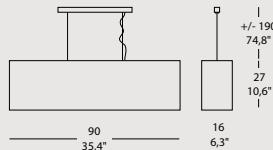

**Diffuser:** metal fabric shade in silver, in red and in ivory color.  
Glow wire test at 850°.
