technical data

A collection of lamps with an hypnotic, futuristic design, ideal for the modern decor, but inspired to the absolutely vintage style. Spring calls to mind the magic springs with which the kids in the 50s used to play. The game continues, but in this case with light. The light produced by the lighting body, filtering through the spirals, creates as a matter of fact a sophisticated optical illusion, that animates the location and further enhances the lamp, available in multiple versions. As with our other creations, Spring combines aesthetic creativity and craftsmanship: the materials with which the excellence is made.

**Frame:** chrome-metal springs in these colors: chrome, white polished finish and black polished finish. Versions PL55 and TE are completely in chrome, white polished finish and black polished finish.

**Diffuser:** transparent blown glass and frosted glass.

### SPRING 50 55

1 x MAX 105W E26 alo.  ENERGY SAVER  
or  
1 x MAX 23W E26 PL-EL  ENERGY SAVER  
F IP 20 1 EAC

### SPRING PL 55

1 x MAX 105W E26 alo.  ENERGY SAVER  
or  
1 x MAX 23W E26 PL-EL  ENERGY SAVER  
F IP 20 1 EAC
