

PANK™ CAMOUFLAGE TYPE:

SERIES

PROJECT NAME:

PANK CAMOUFLAGE

technical data

Inspired by the iconic battle dress uniforms, the Camouflage version of the Pank collection experiments with light the latest innovations of digital fabric printing.

The already versatile collection is enriched with new and deliberately provocative textures in line with the latest fashion trends, offering new ideas and inspirations for interior design but also for public spaces, according to your personality.

The digital printing versatility allows you to personalize and solve special needs, by the change of color to the inclusion of a logo, but first of all it solves the technical problem of the continuity of the drawing on the seam of the lampshade, which is not possible with the tissues on the market.

Frame: matt white metal.

Diffuser: digitally printed fabric lampshades in various textures and colors as specified in the data sheet.
Class 1B fire-proof.

C1: Camouflage Winter

C3: Camouflage Desert

C4: Camouflage Classic

C5: Camouflage Vogue

C6: Camouflage Fashion

The effective colours of the lampshades may differ slightly from the colours reproduced on paper, with the light either on or off.

DIGITAL PRINTING: innovative solution that allows to guarantee the continuity of the design motif in the seam of the lampshade.
