

ROUND™

SERIES

TYPE:

PROJECT NAME:

ROUND

technical data

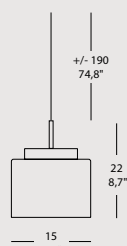

A collection that catches the eye in all its forms. Round can be a refined table lamp in the most modern living rooms, but also a sophisticated ceiling lamp in the most trendy clubs, and an elegant wall lamp in a study. Through the metallic convex lens, through a mirror effect, Round becomes reflection of the same spaces and co-star of the furniture. In the version with satin finish glass lens, instead, it becomes a discreet presence, and an accomplice of a sober but totally chic style.

Frame: chrome-or satin finish nickel metall.

Diffuser: milk-white or red frosted blown glass.
