

# SAINT-TROPEZ™

S78Z1C1 WALL LIGHT

**TYPE:**

**PROJECT NAME:**

Saint-Tropez is a collection of classy and versatile lamps. The idea conveyed by this line is to create an outdoor environment that completely envelops those who live there. The products are characterised by a very strong visual impact: the shape is designed so the light shines downward, with a totally environmentally-friendly approach. The delicate and non-invasive balance between the shape and the light allows this lamp to be placed in outdoor spaces without upsetting the harmony of nature but rather defining it
