POWER SUPPLY DIAGRAM

CREA consists of rods in two different sizes, each split in half to separate the two conductive parts, thereby providing both Positive and Negative polarities within the same rod. Depending on how they are installed, the rods can function either as **supporting rods** ("connected to the low voltage 24V) or as **supported rods** (wirelessly powered through contact and overlap). Each **supported rod** lights up when it comes into contact with two rods of opposite polarity, thus closing the circuit.

The rods can be placed on any side, allowing the light to be directed as desired.

FINISHES

polished nickel

satined brass

LED 16W 24V 1900lm 3000°K

S35CREA01NK3K polished nickel

S35CREA01OT3K satined brass

LED 24W 24V 2850lm 3000°K

S35CREA02NK3K polished nickel ottone

S35CREA02OT3K satined brass

Locking rods jointed

S35CREK01NK polished nickel

S35CREK01OT satined brass

Wall-mounted rod clamping

S35CREK02NK polished nickel

S35CREK02OT satined brass

Remote power supply plate

S35CREK03NK polished nickel

S35CREK03OT satined brass

Pair of conductive support cables made of copper and steel, nylon-coated, for suspension systems

S35CREK04NK Black and transparent cable with polished nickel support

S35CREK04OT Black and transparent cable with satined brass support

Pair of copper and steel conductive cables with insulating nylon coating, for wall-mounted versions

S35CREK05NK Black and transparent cable with polished nickel support

S35CREK05OT Black and transparent cable with satined brass support

ORDERING INFO

Order Code(s) and Quantities

Driver Options

- ☐ 120V Phase Dimming
- ☐ 120V 0-10V Dimming
- ☐ 277V 0-10V Dimming

Fixed and articulated rods and locking elements, in polished nickel and satined brass finishes.
