KARAT™

SERIES

TYPE:

PROJECT NAME:

KARAT technical data

Karat is a shining example of excellent craftsmanship. The shape of this elegant lamp is reminiscent of a diamond, but its preciousness is given by the mastery of the crystal cut, which emphasized by the light guarantees an aesthetic effect. The light - which is trapped by the geometric transparencies inside the glass - refracts and radiates into a play of exquisite points of brilliance. Its effect can give value to any space.

Frame: chrome-metal.

Diffuser: clear crystal or frosted inside crystal.
